# Concentrated Animal Feeding Operations in Michigan
## (CAFOs or Factory Farms)

Compiled by the Michigan Chapter of the Sierra Club

The following document was compiled by the Sierra Club and reflects information from a number of different sources. Notes on the sources of information follows:

Listed CAFOs
This list of CAFOs is based upon information obtained by the Michigan Department of Environmental Quality (MDEQ) and the Environmental Protection Agency. The State of Michigan does not currently have a complete list of all Michigan CAFOs, and as such, this document is not comprehensive. The Sierra Club is aware of numerous CAFO facilities that are not included on either list.

DEQ Violations
Information regarding violations was obtained through the MDEQ and EPA. ONLY those facilities for which the Sierra Club or ECCSCM has submitted Freedom of Information Act requests are listed in this document. Many known violations have occured, however unless a regulatory agent has taken action on a complaint, no formal record of the violation exists.

Known Subsidies
The information contained in the "Known Subsidies" column was obtained from the Environmental Working Group's Farm Subsidy Database (http://www.ewg.org/farm/region.php?fips=26000). This column includes subsidies that went directly to the CAFO or the primary owner between 1995 and 2003. However, CAFOs can receive subsidies under many different names (including partner names, corporate names, subsidiary names and others). As such, the compilation of subsidies are estimates, only.

Watershed
If a CAFO and its associated manure application area exists within more than one watershed, the larger of the watersheds is listed.

Outlet
At times, the existence of coastal wetlands can make it difficult to determine exact outlets of watersheds. When this is the case, the Outlet column identifies the receiving Great Lake, via "unknown creeks."

Any suspected errors in this document should be reported to the Sierra Club at (517) 484-2372.
