December 6 - 06

To all concerned people,

This House Bill 5267 is very important. I am a child advocate. Our current court system is rife with political appointments jobs, workers who have little or no training and are very biased. This is a totally broken system. When I read my son's 70C evaluation from a one hour interview I wouldn't even recognize him. Judges are making decisions on this based information.

My son is an exemplary father and is happy to pay fair child support. He totally loves his son and he wants to be a Father to him. He wants to make decisions

and provide a Fatherly role & influence in his life. Fathers are so important to a child. A child needs both parents. Any Mother and Grandmother would be so happy to have such a good Father in their childs life.

Currently my son has no ability to make decisions. Jeff has been stripped of his Fatherly power to make decision. The judge & the totally dispunctional F.O.C. system makes decisions for him. He may not make a simple decision like taking his child out of day care for a day to spend time with his Father. Who wouldn't want a wonderful loving Father to take care of his child? Instead of a day care worker. Judith Faye
