TBI survivor 4-25-13

David St. Amant

May 30, 2003

3 month coma

5 months hospital

on going therapy

retaught everything
- Seeing
- Breathing
- swallowing
- walking
- talking
- without these therapies I'd be in custodial care. Also, MI is perfectly positioned to help troops with TBI's

All of my healing and ~~many others~~ the road many others must travel, is possible because of Auto No fault

Linda St. Amant 4-25-13

mother of TBI survivor

David's accident occurred May 30, 2003 3 wks after his 16th birthday 3 months coma After 2 weeks of showing ~~no~~ no sign of surfacing from his coma it was suggested we put him in custodial care! Instead we found Mary Free Bed Rehab. Hospital. David was there 5 months. He continues therapies to this day. David had no muscle memory - everything had to be retaught. Everything - vision, speech, swallowing walking talking!

Thanks to Auto No Fault, David lives a productive life.

In regards to a $125.00 savings per car, there is no guarantee.

The flawed thinking that the medicaid / medicare system can absorb the influx of recipients if there is a change to the no fault is deadicrus.

I hope that you, personally, do not have to learn by experience.
