RE: House Bill 5700

Dear Michigan House of Representatives

I am Michigan aerial applicator, from Hamilton, MI. I have great concerns about this House Bill 5700 being introduced to you and the House. I have concerns as a Commercial Aerial Pesticide Applicator, and for a citizen of Michigan. This bill will loosen the requirements that I and all the applicators that are licensed in MI have worked with and responsibly applied pesticides to since 1990. If this passes out state applicator will not have to meet the requirements of Part 83 , section 8315(2). This bill would allow pesticide application to applied by other States rules. This opens the door to applicators not being governed by our MDARD!

Respectfully please turn down this House Bill to continue responsible application of pesticides on our Michigan lands and waters!

Thank You for your time!
