REGARDING: Revenue Sharing Payments to Local Governments

This publication provides information on Michigan's revenue sharing payments made to local units. Statutory and constitutional appropriations for FYs 1999-2000, 2000-01, and 2001-02-under current law and based on current enacted estimates-are discussed in the Overview. In addition, historical background is provided for formula changes in revenue sharing payments since FY 1972-73.

Appendices A and B provide detail for revenue sharing special census payments (A) and general revenue sharing payments to local units (B). Estimates shown in this document are based on the May 2001 Consensus Revenue Estimating Conference agreement. Minor differences in these estimates from other estimates are attributable to rounding.

Jim Stansell, HFA Economist, provided the information presented in this report. Jeanne Dee, Administrative Assistant, prepared the report for publication.

I am available, as is Jim Stansell, to answer questions regarding revenue sharing payments. Please do not hesitate to call if we can be of further assistance.

Mitchell E. Bean, Director

TABLE OF CONTENTS

Overview	1
FY 1972-73 through FY 1997-98: Revenue Sharing Historical Overview	2
FY 1998-99 through FY 2001-02: Revenue Sharing Appropriations and Distribution Formulas	4
Appendix A: Revenue Sharing Special Census Payments	. 10
Appendix B: General Revenue Sharing Payments to Local Units	12

Revenue sharing payments are state funds appropriated to approximately 1,880 local units to spend as unrestricted revenue. Total revenue sharing appropriations for FY 1999-2000 and FY 2000-01, and the enacted estimate for FY 2001-02, are shown in Table 1.

In FY 1999-2000, \$1,462.2 million was distributed. In FY 2000-01, \$1,555.4 million was distributed, which represents an increase of \$93.2 million. In FY 2001-02, revenue sharing payments to cities, villages, and townships (CVTs) and counties will total \$1,577.8 million, based on the May 2001 consensus estimated sales tax collections and the subsequent enacted appropriation. Revenue sharing payments for FY 2001-02 were reduced by \$50.0 million from the full funding level, but are expected to increase by \$22.3 million, or 1.4%, from FY 2000-01.

Table 1
CONSTITUTIONAL AND STATUTORY REVENUE SHARING APPROPRIATIONS

Townships	324.7	381.3	396.6	15.3	4.0%	

NOTE: Due to rounding, numbers may not add exactly.

In its most basic form, the revenue sharing process can be divided into two components: appropriation of funding and distribution of that funding. Appropriation of funding is based on both constitutional and statutory formulas. The Legislature may adjust statutory distribution formulas, but not constitutional formulas, to achieve a desired level of funding to local units of government. Actual distribution of the funding, as set forth in 1998 PA 532, tends to be more complex. Two major sections that follow contain an historical overview and a description of the formulas currently used to fund and to distribute revenue sharing payments.

FY 1972-73 THROUGH FY 1997-98: REVENUE SHARING HISTORICAL OVERVIEW

Revenue Sharing: FY 1972-73 — FY 1995-96

From the early 1970s through FY 1995-96, no substantial changes to the distribution formulas were made in Michigan's revenue sharing program. However, reductions from the statutory levels occurred in the 1990s, as discussed below.

Prior to FY 1996-97, revenue sharing sources included sales tax, income tax, single business tax, and intangibles tax revenue. Sales tax revenue was constitutionally earmarked to cities, villages, and townships (CVTs), while the other sources were statutorily earmarked to all local units. Of the total revenue sharing funds available, approximately 40% came from sales tax revenue, 35% from income tax revenue, and 25% from single business tax revenue. Intangibles tax revenue has not been paid since FY 1992-93.

Economic and state budget pressures in the early 1990s resulted in revenue sharing reductions from the statutory levels. These reductions, referred to as freeze lag reductions, began in FY 1990-91 and lasted through FY 1996-97 as depicted in Table 2. The reductions in FY 1998-99 and FY 1999-2000 (discussed later in this document) are a result of the appropriations cap in total revenue sharing payments.

Table 2

REVENUE SHARING REDUCTIONS FROM THE STATUTORY LEVEL

FY 1990-91 through FY 2001-02

(Millions of Dollars)

	(Millions of Dollars)	
FY 1990-91	\$10.7	
FY 1991-92	\$112.2	**

FY 2000-01	\$0.0	
FY 2001-02*	\$50.0	

^{*}Consensus estimates based on enacted appropriations.

Three distribution methods were used to distribute revenue sharing payments to local units: per capita, relative tax effort (RTE), and inventory reimbursement.

^{**}Due to different fiscal year periods (state vs local), this was a state, but not a local, reduction. As a result of forward funding, \$112.2 was shifted into the state's next fiscal year, but was postponed for local units.

PER CAPITA FORMULA was based purely on population.

RELATIVE TAX EFFORT (RTE) FORMULA was based on the amount of revenue each local unit raised compared to the statewide average. This approach was based on the concept that local governments which impose the highest tax burdens need the most assistance to meet their spending needs.

INVENTORY REIMBURSEMENT FORMULA was based on each local unit's millage rate and the 1975 state equalized value of business inventory.

These three distribution formulas were used to make revenue sharing payments to CVTs, while the counties received payments through the per capita formula and the inventory reimbursement formula. Of the total revenue sharing dollars distributed, approximately 55% was disbursed under the per capita formula, 35% under the RTE formula, and 10% under the inventory reimbursement formula.

Revenue Sharing: FY 1996-97—FY 1997-98

A transition period occurred with Michigan's revenue sharing program in FY 1996-97 and FY 1997-98. The key components of this period are discussed below.

In FY 1996-97, the income tax, single business tax, and intangibles tax revenues were eliminated as statutory revenue sharing sources and were replaced with an additional 21.3% of sales tax revenue at the 4% rate. The statutory earmarking of sales tax revenue replaced the previous taxes at a rate that built in the continued statutory reductions. In addition to the statutory earmarking, 15% of the sales tax revenue at the 4% rate continued to be constitutionally earmarked. Beginning in FY 1996-97, the total amount for state revenue sharing payments was limited to the total amount appropriated for this purpose in the general government appropriations bills.

In FY 1997-98, minor distributional changes were implemented. The total distributed in FY 1997-98 under the RTE formula was capped at the FY 1996-97 level, with the growth above that level distributed on a per capita basis to CVTs.

Revenue Sharing: FY 1998-99 to Present

Beginning in FY 1998-99, local revenue sharing underwent significant changes in both the appropriation guidelines and the distribution mechanism. These changes were contained in 1998 PA 532; discussion of these changes follows.

FY 1998-99 THROUGH FY 2001-02: REVENUE SHARING APPROPRIATIONS AND DISTRIBUTION FORMULAS

Revenue Sharing Sources/Appropriations

The sources of revenue sharing payments are a constitutional earmarking and a statutory earmarking of sales tax revenue, subject to the appropriations process. The constitutional earmark is 15% of sales tax revenue at a 4% rate, while the statutory earmark is 21.3% of sales tax revenue at a 4% rate.

During the budget process, however, the appropriation is set based on estimates for the next fiscal year. Thus, the actual total appropriation will differ from the sum of the final or actual constitutional earmark and the statutory earmark. As a result, the actual constitutional earmark will be paid first, and the difference between the total appropriation and the constitutional piece will be the statutory distribution.

Figure 1 depicts the percentage in general revenue sharing payments from FY 1989-90 through FY 2001-02. The average increase during this period is 3.7%.

Figure 1

Percent Change in General Revenue Sharing Payments FY 1989-90 through FY 2001-02

*Consensus estimates based

on enacted appropriations.

**Due to different fiscal year periods (state vs local), this was a state, but not a local, reduction.

As a result of forward funding, \$112.2 was shifted into the state's next fiscal year,
but was postponed for local units.

Revenue Sharing Distributions

Figure 2 is a flow chart of the distribution of revenue sharing appropriations when the new formulas contained in 1998 PA 532 are fully phased in. A more complete description follows.

Figure 2
Revenue Sharing Distribution when 1998 PA 532 is Fully Phased In (FY 2006-07)

Constitutional Distribution

PER CAPITA

The constitutional distribution is made to cities, villages, and townships on a per capita or a pure population basis.

Statutory Distribution

The statutory revenue sharing formulas, as specified in the State Revenue Sharing Act of 1971, as amended, sunset June 30, 2007.

COUNTIES

Counties receive 25.06% of the statutory distributions as specified in the appropriation. Approximately \$30.0 million is distributed under the inventory reimbursement formula described in the historical overview. The remaining amount, or over 85%, is distributed based entirely on population.

CITIES, VILLAGES, TOWNSHIPS (CVTs)

Cities, villages, and townships receive 74.94% of the statutory distributions. The City of Detroit is set, or frozen, at total revenue sharing payments of \$333.9 million until the sunset date (June 30, 2007). If sales tax revenue declines in a fiscal year, then the revenue sharing payment to the City of Detroit will decline by the same percent as the decline in sales tax revenue. The remainder of the statutory funding is phased in at a rate of 10% per fiscal year as indicated in Table 3. These formulas, used to distribute payments to all other CVTs, are described as follows.

Table 3
REVENUE SHARING STATUTORY FORMULA PHASE-IN SCHEDULE

	FY 1999-2000	FY 2000-01	FY 2001-02
Old Formulas			
FY 1997-98 Pro-rata Distribution	80%	70%	60%
New Formulas: Each Weighted 1/3			
1/3 Inverse Taxable Value			
1/3 Yield Equalization	20%	30%	40%
1/3 Unit Type Population Group			

INVERSE TAXABLE VALUE

This formula is the statewide taxable value per capita divided by each CVT's taxable value per capita. Local units with a relatively high taxable value per person receive lower inverse taxable value payments, while local units with a relatively low taxable value per person receive higher inverse taxable value payments.

YIELD EQUALIZATION

This method equalizes the return for each mill levied, up to a maximum of 20 mills. Local units with comparatively low taxable value per person receive yield equalization payments, while local units with comparatively high taxable value per person receive no yield equalization payments. Typically, about one-half of all CVTs receive yield equalization payments.

UNIT TYPE — POPULATION GROUP

Under this method of distribution, local unit populations are weighted according to the schedule in Table 4. Townships with populations greater than or equal to 20,000 are weighted as cities. Townships that provide certain fire, police, water, and sewer services and have a population between 10,000 and 20,000 are also weighted as cities. The higher the weight factor, the higher the payment; the lower the weight factor, the lower the payment.

Table 4
UNIT TYPE POPULATION WEIGHT FACTOR

	Unit Type Factor				
<u>Population</u>	<u>City</u>	<u>Village</u>	<u>Township</u>		
0 - 5,000	2.50	1.50	1.00		
5,001 - 10,000	3.00	1.80	1.20		
10,001 - 20,000	3.60	2.16	1.44 / 3.60		
20,001 - 40,000	4.32	2.16	4.32		
40,001 - 80,000	5.18	2.16	5.18		
80,001 - 160,000	6.22	2.16	6.22		
160,001 - 320,000	7.46	2.16	7.46		
320,001 - 640,000	8.96	2.16	8.96		
Greater than 640,000	10.75	2.16	10.75		

FY 1997-98 DISTRIBUTION

This formula is the pro-rata share for each CVT of the FY 1997-98 statutory distribution. This formula is being phased out at a rate of 10% per fiscal year.

EIGHT PERCENT CAP

The State Revenue Sharing Act of 1971, as amended, stipulates that the total revenue sharing payment to any city, village, or township (CVT) cannot increase by more than 8% of the total payment received in the preceding fiscal year. Local units that are subject to the 8% cap are eligible to participate in a process in which the funds in excess of the cap are redistributed to those CVTs that realized the smallest percentage gain to provide a floor, or minimum percentage change, in their total revenue sharing payments. The floor, which varies from year to year, is determined by the total appropriation and the amount of revenue sharing payments in excess of the 8% cap that is available for redistribution.

The 8% cap was applied to all CVTs in FY 1998-99 and in FY 1999-2000. However, beginning in FY 2000-01, if a CVT's population increase between the 1990 and the 2000 decennial census is at least 10%, then the 8% cap does not apply. Examination of official

2000 Census population figures reveals that almost one-half of the local units meet or exceed 10% population growth.

MULTIPLE COUNTY UNITS

There are 23 cities and villages in Michigan that overlap county lines; these are referred to as split units in Appendix B. Even though each of these units exists in more than one county, the Department of Treasury treats each one as a joint entity. For example, the city of Holland straddles both Allegan and Ottawa counties. For revenue sharing purposes, however, Holland is treated as a single city.

APPENDIX A

REVENUE SHARING SPECIAL CENSUS PAYMENTS

Special census payments are General Fund/General Purpose (GF/GP) appropriations to cities, villages, and townships that have significant population increases between the federal decennial census counts. These estimates are not included in the figures in Appendix B.
