WRC
WATER RESOURCES COMMISSIONER

Jim Nash

March 2, 2015

Attention: House of Representatives Appropriations Committee:
Room 426, Capitol Building, Lansing, Michigan

Dear Representatives:

Recently the appropriations committee met to make recommendations concerning a sunset provision of the environmental quality fee structure. I am concerned that if the fee structure is allowed to expire, many important programs designed to protect the environment would lack sufficient funding to support the Michigan Department of Environmental Quality's (MDEQ) water quality and water use initiatives.

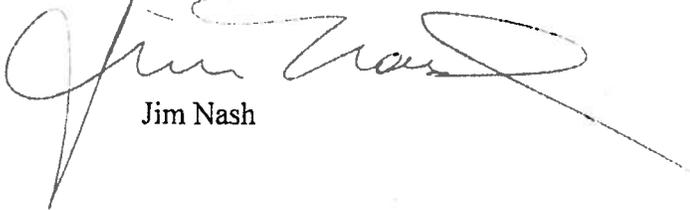

As you know, my staff and I have worked closely with the MDEQ leadership to preserve and protect the water quality of the state. Programs like the recent Stormwater, Asset Management and Wastewater (SAW) grant proposals were successful on many fronts because we were able to work with the MDEQ to solve funding issues.

The fee structure was another success that occurred between communities and the MDEQ. It has been in place for more than 10 years and many communities rely on these fees to fund programs such as the National Pollutant Discharge Elimination System (NPDES) Permit Fee, the Stormwater Permit Fee, and the Biosolids Permit Fees.

These programs were intended to become self-funded through their fee structure. It meant that communities that utilize a particular regulation would have sufficient financial support. Although lower fees and taxes are desired, they must not be at the expense of critically important programs that fall under federal and state rules. Therefore, I cannot support proposals that sunset the fee structure at this time.

If you have any questions, please contact me.

Sincerely,

Jim Nash
