Subject: HB 4540

Please pass this on to the House Oversight and Ethics Committee members.

It has recently come to the attention of Michigan residents that a bill has been proposed which will further erode the few remaining protections we have against pipeline companies. These companies are preparing to do more destruction to our properties, the environment, and our health.

According to House Bill 4540, basic information "about the production, generation, transportation, transmission, or distribution of fuel or energy" would be exempt from Michigan's Freedom of Information Act.

Please vote down HB 4540.

Every hour, the sun shines enough energy on our tiny planet to satisfy our needs around the globe for a year.

Let's leave the fossil fuels in the ground and capture that green energy.
