Concerning HB 4550

To Chairman Mcbroom and House Oversight and Ethics Committee members:

We don't need this bill. Federal law already addresses issues concerned with pipeline security. In addition, Michigan's FOIA law already prevents disclosure of records that pertain to safety and security.

We must be able to see public records regarding safety and maintenance of pipelines crossing Michigan underwater and below ground. If there is a pipeline crossing my property I want to know what is going on beneath me. If it crosses public property citizens must be able to find out what is going on "down there" that may not be safe.

HB 4540 makes us less safe and secure, not more !
